PREFATORY NOTE

This index undertakes to deal only with the printed reports of administrative officers, legislative committees, and special commissions of the states and with governors' messages for the period since 1789. It does not refer to constitutions, laws, legislative proceedings or court decisions, except in so far as they happen to be found in the class of documents above mentioned. It attempts, on the other hand, to furnish a list, as complete as possible, of all the documents and messages which fall within its scope, in whatever form they may have been published, whether separately, in collected documents, legislative journals or volumes of laws, and to indicate the volume in which they may be found. In addition to furnishing a list of reports and messages, the index undertakes to supply a reference by volume and page to all material of economic importance which they contain, with the exception of that contained in the reports of bureaus of labor before 1902. The reason for this exception is that these reports have already been indexed by the late Carroll D. Wright, when United States Commissioner of Labor,¹ in a volume published by his department in 1902.

Although the index is confined to matter of economic bearing, the term "economic" has been given a broad interpretation. In view of this liberal interpretation it is believed that the index will constitute a useful addition to the resources of students of almost any aspect of American history.

It will be seen that the present index differs both in scope and character from R. R. Bowker's "State Publications," the valuable pioneer work in this field. It is narrower in scope than "State Publications," which aims to present a list not only of reports and governors' messages but of all state documents; but in the field which the present work covers it contains not only a more complete list of documents than has hitherto been published but also an index of their contents in so far as these have an economic bearing.

The arrangement is alphabetical by topics. The references under each topic are divided into two groups, viz., "serial" and "non-serial." Within each of these divisions the arrangement is chronological. Numerous cross-references will, it is hoped, make it possible to discover with little difficulty all the material bearing on a topic. A division of serial reports into more than one series occurs whenever there is a change in title, in the authority making the report or in frequency of issue. It will be seen that this division is not an arbitrary one. It is made in the belief that it will contribute to a clearer understanding of the facts than would a narrative explanation.

¹ Index of all reports issued by bureaus of labor statistics in the U. S. prior to Mch. 1, 1902. Wash., 1902. 287 pp. 8°.

Uniform entry words for subjects recurring in different states will be retained throughout the series. It will thus be possible to make a study not only of the historical development of an economic subject as reflected in the documents of an individual state but also to make a comparative study of that development as it has taken place in the country at large. To accomplish this purpose it has been necessary to make the selection of entry words without reference to the peculiarities of local usage, such peculiarities being recognized in the case of each state by cross-references. The abbreviations employed are believed to be sufficiently obvious to make a table of them unnecessary. Unless otherwise stated the size of the books is octavo.

A feature introduced in the New York part of this index, and not employed in the preceding parts (i. e. Maine, New Hampshire, and Vermont), is the system of references from locality. This feature has been made a part of the succeeding issues.

The regrettable fact must be recorded that it has not been possible to collate a continuous file of Delaware Journals. Every reasonable effort was made to discover these missing Journals. It is hoped that, as has happened with other "lost" books, a copy or copies of these Journals will yet be found by someone more successful than the present compiler.

It was thought best not to assign serial numbers to the Collected Documents, until all the journals shall have been recorded.

The present volume has been preceded by nine similar volumes, devoted to the states of Maine, New Hampshire, Vermont, New York, Rhode Island, Massachusetts, California, Illinois, and Kentucky, respectively. It will be followed by others, each devoted to a single state. The work when completed will, therefore, furnish an index to the economic material in the reports and governors' messages of all the states of the Union.

In the preparation of this volume the collection of the New York Public Library has been used as a basis, and, unless otherwise shown, the material indexed is in that library. The collections of the Library of Congress, the Delaware State Library, the Wilmington Institute Free Library, and the Delaware Historical Society have also been examined. Acknowledgment is made for courtesies extended by each of these institutions in the course of the compilation of the present volume.

PART I

COLLECTED DOCUMENTS

Delaware's set of Collected docs. comprises the House and Senate journals. A good part, but not all, of Delaware's departmental reports are included in these journals, as is shown under the various subjects of agriculture, insurance, etc., in the analysis in part two of this index.

Very few copies of the early journals were printed. Up to and including 1794, 100 copies only were printed and the distribution of each was provided for by law. In 1795, 150 copies were printed, in 1796 and for some time thereafter, 150 and 200 copies variously, but no more, were printed. This small edition together with the fact that the placing of every copy was provided for, has naturally brought about the result, that copies are at the present time very difficult to get. They rarely appear in the book markets.

Delaware, it is safe to say, is that one of the thirteen original states whose documents have received the least attention.

It has been customary in preceding volumes of this index to include here a list of general descriptive works, legislative manuals, etc., issued by authority of the state.

The only publication of this nature found in Delaware is the Circular of information issued for distribution at the Pan-American Exposition in 1901. The text of this circular is printed in the annual report of the board of agriculture for 1901, pages 9-16. It was also issued as an 8-page separate in an edition of 10,000, but no copy was seen by the compiler.

- Condition of the free schools. (*Same* 1889/90: 5-6.)
- Steady improvement during past 2 yrs. in general condition of free schools of state, but neither the state school system nor the administration of it has reached anything yet like perfection—distr. system necessarily weak—adoption of the hundred system recommended; extr. from former rept. on this subject; suggestion rel. to dividing the hundreds. (*Same* 1889/90: 5-6.)
- Extr. from previous rept. rel. to incorporated schools. (*Same* 1889/90: 10-11.)
1891. Free schools; suggesting such amdmts. to school law as will prevent further changes in the school distrs. unless upon application of a majority of school voters in each distr. to be affected by such change; also, that such action be taken as will place entire schools of state under supervision of supts. of free schools. (Govs. mess. (Biggs) Jan. 1891.)
- Suggested expediency of creating state superintendency of public schools in addition to existing co. superintendency; state supt. should be entrusted with supervision of colored schools and administration of funds appropriated for them. (*Same* (Reynolds) Jan. 1891: 5.)

- Sections of school law which need amdmnt. (*Same* 1892: 31-33.)
- Attention called to fact that comrs. may draw their dividends in Aug., but are not required to settle old acct. before Dec. (*Same* 1892: 31.)
- Law in rel. to forfeiting of school dividends, changed in 1887, so far as it relates to Sussex Co., so that all dividends not drawn in that co. by proper authorities of school distrs., on or before expiration of one yr., become forfeited, and revert to school fund of the co.; law as relates to Kent and New Castle Co. requires 3 yrs., 2-yr. plan preferable. (Bienn. rept. of treasurer 1891/2: 12.)

1892. Present system of reporting school statistics expensive to state and troublesome to teachers; suggested that repts. be abbreviated. (Bienn. rept. on free schools 1892: 30-31.)
- Suggested that legislation be reviewed by state bd. of education before taken up by legisl. for final action. (*Same* 1892: 33.)
- Incorporated school bds.; special laws governing incorporated school distrs. removing them from authority of supt. and exempting their teachers from examinations; a serious mistake—remarks of supt. of Sussex Co. (*Same* 1892: 28-29.)
- On incorporated schools; privileges of these schools often abused. (*Same* 1892: 16-17.)
1893. Recommended that secs. 7 and 9 of act rel. to co. school supts. be repealed, and an act be passed in lieu thereof, making all funds payable to co. supts. by state treasurer and co. treasurers, and that supts. be empowered to order and pay for all books and all salaries. (A.R. auditor 1892: vi.)
- Transfer of real estate from one school distr. to another; several acts passed during last sess. for this purpose; reasons for their passage; all changes should be made by Levy Court or by state bd. of education. (*Same* 1892: vi.)

- Transfer of real estate from one school distr. to another, frequent and unjust; this legislation often effected without apparent opposition, simply for want of funds to defray expenses of school officials while making such opposition; state bd. of education should be left to decide all such cases. (*Same* 1894: v.)
- Recommended that in sec. 13, act in rel. to public schools, in regard to insuring of school property, some penalty be imposed for non-compliance with this sec. (*Same* 1894: vi.)

- The act in rel. to public schools; need of various specified amdmts. (*Same* 1894: v-vi.)

1897. Recommended amdmnt. of statutes rel. to free schools, bringing all free schools of state, except those in Wilmington, under supervision of supts. of free schools. (Govs. mess. (Watson) Jan. 1897: 7.)
- Public schools; comment and suggestions. (A.R. auditor 1896: iii-iv.)
- Suggested that law regulating transmission of repts. of the several school mtgs. be so amended as to require that all such repts. be transmitted directly to this dept. only, within 10 days next succeeding mtg.; that part of law requiring their being filed with clerk of the peace should be repealed. (*Same* 1896: iv.)
- Recommended that auditor's dept. be authorized to codify school laws and have prtd. in pamphlet form enough copies to furnish one for use of each school distr. (*Same* 1896: iv.)
1898. Recommended that that part of school law enabling applicants to receive provisional certificates

- be stricken out. (Rept. of state bd. of education 1898: 31.)
1898. Recommendations of bd. for legislation rel. to the free schools. (*Same* 1898: 9-10.)
- Series of blanks compiled by bd. to be immediately circulated throughout state, which, when properly filled in, will furnish, it is hoped, complete and accurate information upon all points and matters necessary for a thorough knowledge of school conditions and needs. (*Same* 1898: 5.)
- In great majority of school distrs. of state, $\frac{3}{4}$ of ann. expense is directly borne by state through the school dividend; state should see that its money is expended for best interests of its wards, the children in her free schools. (*Same* 1898: 4-5.)
- Surprising ignorance throughout state on condition of the schools generally. (*Same* 1898: 4.)
1899. Communication on behalf of committee on education rel. to minority rept. of same. (House jol. Jan. 1899: 902-903.)

(*Same* (Tunnell) Jan. 1901: 11-12.)

comr. shall furnish any supplies for school which shall not have been let out in due form to lowest bidder, also that it be illegal for any school room to be used for holding any but the regular ann. or special school elections. (*Same* 1903/4: 4.)

1904. Recommended that co. comr.'s remuneration from state be increased to \$100 per annum, and that suitable mtgs. and the storage of their records be provided in each co.; also that apprn. be made to procure similar accommodations for co. supts. (*Same* 1903/4: 3-4.)

With the rept. for 1833, a new form of auditor's rept. was inaugurated. The sessions of the legislature which had hitherto been held annually, were, under the amended constitution of 1831, held biennially in the odd years, beginning with the next odd year, i. e. 1833, after the enforcement of the constitution. The auditor's reports, however, continued to be made annually. The report for the even fiscal year was published in the House jol. of the following odd year, as is shown below. The auditor's report for the odd fiscal year was issued as a separate document, beginning with that for 1833. The title page of this separate report reads: "Journal of the committee of the legislature of the state of Delaware . . ." (i. e. joint committee on examination of treasurer's accounts), and comprises a few pages of journal followed by the full report of the auditor on the finances. The report as printed in the journals is minus this journal. This custom prevailed until 1833/4, after which date these reports were printed uniformly as auditor's reports.

- 1833-1904. [Ann. rept. of the auditor.]

Checklist

Contrary to the custom observed in this Index of collating the document and the department editions of serial reports separately, they are here collated in one continuous paragraph. It will be seen that document editions were issued only in alternate years and it was deemed to be more satisfactory to preserve the chronology and break the custom than vice versa.

FINANCE: STATE—cont'd

— Such magnitude and importance attained by insurance interests of people of Del., that a wise and intelligent supervision of insurance by state is a plain and imperative necessity; rigid system of supervision maintained by nearly all other states in Union, and failure on Del.'s part to follow their example, would open the door for admission and establishment of cos. of every kind and description, which may have been excluded elsewhere; benefits of the insurance dept. (1 same 1879/81: 5-6.)

(3 same 1883/5: 4-5.)

(6 *same* 1889/91: 6-7.)
1893. (House jol. Jan. 1839: 136.)
1862. Rept. on res. on propriety of state charging nominal rent for occupancy of all vacant lands to prevent title being obtained to certain lands, by occupancy merely. (*Same* adjd. spec. sess. Jan. 1862: 100-101.)

Escheat

1796. Rept. of auditor on sundry claims agst. certain confiscated estates in New Castle Co. (House jol. Jan. 1796: 137-138.)
1807. Under intestate laws of state, the expense and delay incurred in accomplishing a division or valuation of an intestate's real estate is a subject of just complaint; suggesting whether the 5 freeholders first apptd. might not be authorized to value the land in cases where it would not divide, saving the right of application to those interested for a review and valuation, if in discretion of chancellor such ought to be granted; etc. (Govs. mess. (Mitchell) Jan. 1807.)

1800. List of receipts transmitted to auditor by recorders of deeds of New Castle and Kent cos., do not contain near all the sums of money, which have been paid into treasury for vacant lands in these cos.; this circumstance evinces propriety of the several recorders continuing to make these returns, at least ann., until this business is finally closed; no such list ever obtained from recorder of deeds in Sussex Co., although several applications have been made for same. (*Same* 1799/00: 58.)

 1873. Amt. paid into federal treasury by Del. in shape of duties upon imported goods; tariff rates adjusted more for protection of certain interests in country than to meet wants of treasury. (Same (Ponder) Jan. 1873: 21.)
 1883. Tariff reform: hopeful promise of reformation in present unwise, antiquated, and ill-arranged system of tariff taxation, which has long since ceased to protect even those industries especially selected to receive its benefits, and has been ruinous and distressing to operatives and increased cost of living to the laboring classes; business of ship building, both of iron and wood, so extensive in Del. that it is highly important that commerce and exchanges with other nations be freed from present restrictions; advantages of removing excessive taxation upon ship timber. (Same (Stockley) Jan. 1883.)
 —. Tariff; no more duties should be levied or collected on imports by means of a tariff than are necessary and proper for mtg. legitimate expenses of federal govt.; evil of present high rate of duties on agric. and mnfg. productions. (Same (Biggs) Jan. 1883.)
 1885. Policy of protective tariff discussed at length; effect on industries, laboring classes and capitol. (Same (Stockley) Jan. 1885: 25-28.)

 1891. Federal relations; late unwise and impolitic increase of tariff taxation upon our foreign commerce, in addition to enhancing cost of living in this country, necessarily operates in restriction of foreign markets for our exports, which consist mainly of the natural products of the soil; no domestic tax law can avail to protect products of Amer. labor in any foreign market; extreme depression everywhere in U. S. and especially in Del., in rewards of agric., accompanied by impoverishment of other oc-

- cupations; reform in these unwise policies may be anticipated which shall bring relief. (*Same* (Reynolds) Jan. 1891: 4-5.)
1893. Farmers' pecuniary burdens would be lightened by relief from tariff tax. (*Same* (Reynolds) Jan. 1893: 33.)

1875. "Annihilation of our well secured State bank issues by ruthless exercise of Congressional power of taxation is continued; supply of paper money of the U. S.—our only circulating medium—floating off to great money centres, leaving rural districts denuded of necessary medium of exchange." (Govs. inaug. mess. (Cochran) Jan. 1875: 6.)

TAXATION: STATE

1801. Impracticable to ascertain precisely on unsettled comns. and delinquent taxes either the surplus or deficiency throughout state; if collectors were compelled by law to return their delinquencies to treasurer, and have their comns. settled by him within limited time, it would contribute greatly to a final settlement of the taxes, and also be attended with other advantages to this dept. (A.R. auditor 1800/1: 22-23.)
1803. Collectors in arrear previously to 1790, and their securities sued many yrs. ago; only in one or two instances is there the least prospect of any monies coming into treasury on acct. of those taxes. (*Same* 1802/3: 45.)

- Should legisl. deem it expedient that the resources of the state should acquire an increase of strength by an accumulation of the funds, it will be necessary to direct a tax to be levied, sufficient to defray expenses of present yr. (A.R. auditor 1807: 31.)
- In conformity to res. of Jan. 31, all arrearage taxes therein mentioned have been accounted for "as monies in hands of the treasurer," with exception of a small balance due from a collector of 1801; this circumstance arises from a difference in the return of tax made to treasurer, and the one transmitted to auditor. (*Same* 1806: 25.)
1809. Should Gen. Assem. think proper to direct a tax to be laid for support of the govt. for 1810, a part of the money now in treasury could with safety be applied to the purchase of some productive stock. (*Same* 1808/9: 33.)

1867. Suggesting that provision be made to meet any additional expense of state, without imposition of any general tax, or tax of any kind which would be the least burdensome to any class of citizens. (Govs. mess. (Saulsbury) Jan. 1867.)
1871. Propriety of amending revenue act passed April 8, 1869; repeal of all existing revenue laws for both state and co. purposes, and enactment of an entirely new law suggested, retaining system of poll tax, taxing annually every corporate franchise granted by the state on its real value, and every citizen on amt. of his net wealth, making available every source of revenue from property in state and continuing such a judicious and wholesome license system as will be calculated to protect the public morals and properly regulate business.
